

Fujitsu recommends Windows 10 Pro.

FUJITSU

World's Most Secure Mobile Workstations

FUJITSU CELSIUS H780 and H980 Mobile Workstations with PalmSecure™

Are you an architect, engineer or designer carrying sensitive information on your mobile workstation? PalmSecure™ is the world's leading-edge biometric authentication system, invented by the Fujitsu Laboratories. It offers the highest levels of security as the authentication by the user is based on vein pattern recognition. Palm veins are internal and have a wealth of differentiating features, which make attempts to forge an identity extremely difficult.
